

CLAIMS (Amended)

Claim 5:

1. A health pill for preventing smoking related cancers, cardiovascular diseases, respiratory diseases, and other smoking caused physical problems, wherein for 100 gram of tobacco (about 20 cigarettes x 6.667 packs), the composition, in oral dosage form, comprises:

*Sodium selenite	0.2-14.6 mg
B-cyclodextrin (1.85%)	3.5-67 ml
*Vitamin E	0.2-10 g
*Vitamin A	3-35 mg
Butylated hydroxytoluene	0.3-27 mg
Riboflavin	7-200 mg
*Nicotinic acid	7-2000 mg
*Pyridoxine hydrochloride	33-2000 mg

2. A health pill supplemental to claim 5, wherein for 100 gram of tobacco (about 20 cigarettes x 6.667 packs), the composition, in oral dosage form, comprises:

*Ascorbic acid	0.07-6 g
----------------	----------

3. A liquid additive supplemental to claim 5, for reducing the toxicity in tobacco smoke such as nicotine, tar (including polycyclic aromatic hydrocarbons represented by 3, 4 benzo(a)phrene), carbon monoxide, nitric oxide compound, hydro cyanic acid, cadmium, mercury, arsenic, nitrosamine, wherein for 100 grams of tobacco, the composition, in liquid additive form, comprises:

Tween-80	0.7-15ml
----------	----------

Hot water (55-60°C)	50-100 ml
Cerium dioxide	7-134mg
Sulfuric acid (5%-20%) V/V	0.2-10 ml
Selenium dioxide	0.4-8mg
B-cyclodextrin	0.1- 4 g
Hydrogen peroxide (3% or 6%)	30-600 ml
Potassium permanganate	15-150 mg
*Cupric Sulfate	45--400 mg
Cupric Oxide	20--270 mg
Activated Manganese dioxide	10--100 mg

4. A method, according to Claim 5, for resuming the activity of glutathione peroxidase (GSH-PX) by applying a co-enzyme to guarantee its unfailing effect in reducing tobacco toxicity and preventing diseases.
5. A method, according to Claim 5, for eliminating smoker's addiction, wherein Nicotinic acid, Pyridoxine, Vitamin E, Vitamin A, hydrochloride Ascorbic acid, Cupric Sulfate are designed to decrease dopamine and glutamic acid in the human brain through a) copper compound & manganese compound to strengthen MAO's activity; b) VB6 to turn glutamic acid to γ -aminobutyric acid (GABA); c) VA, VE, VC and other anti-oxidants to prevent excessive iron in the body from releasing glutamic acid in the brain.

ABSTRACT OF THE DISCLOSURE:

This invention is a preparation with comprehensive and multi-functions -- for reducing the toxicity in cigarette smoke, strengthening smokers' health and eliminating

their addiction to smoking. More specifically, the liquid additive is designed to lower the toxin level in tobacco smoke on a broader scale and by a larger margin; the health pills, with their unfailing nutritious effect guaranteed, can fundamentally prevent smokers from getting various smoking related diseases; both the liquid additive and the health pills can also resolve and inactivate the addiction-causing substances in the human brain so as to help smokers quit smoking.
